

GEORGII OBLAPENKO

georgii.oblapenko@dlr.de

Ph.D. (Mechanics of Fluid, Gas and Plasma) \diamond Postdoctoral Researcher

German Aerospace Center (DLR), Göttingen

WORK EXPERIENCE

German Aerospace Center (DLR)

November 2021 – Present

Postdoctoral Researcher *Institute of Aerodynamics and Flow Technology, Spacecraft Department*

Uncertainty quantification of hypersonic expanding continuum flows. Development of new Direct Simulation Monte Carlo methods for plasma simulation. Development of a photon Monte Carlo radiation transport code. Development of moment method models for gases with internal degrees of freedom. Supported by a stipend of the Alexander von Humboldt Foundation.

University of Texas at Austin

September 2022 – Present

Scientific consultant *Oden Institute for Computational Engineering and Sciences / Department of Department of Aerospace Engineering and Engineering Mechanics*

Mentoring of Master student developing PIC-DSMC methods for high-voltage gap closure modelling.

University of Texas at Austin

January 2019 – June 2021

Postdoctoral Research Fellow *Oden Institute for Computational Engineering and Sciences / Department of Department of Aerospace Engineering and Engineering Mechanics*

Development of Discrete Velocity Method and Direct Simulation Monte Carlo codes for modeling of ionized rarefied gas flows. Development of new kinetic models for gases with internal degrees of freedom and chemically reacting gas flows.

University of Texas at Austin

July 2018 – January 2019

Scientific Consultant *Oden Institute for Computational Engineering and Sciences / Department of Department of Aerospace Engineering and Engineering Mechanics*

Development of a hybrid Discrete Velocity Method/Direct Simulation Monte Carlo code.

Saint-Petersburg State University

September 2015 – December 2017

Research engineer *Department of Hydroaeromechanics*

Lead developer of a C++ library aimed for kinetic theory computations. Implementation of state-to-state models in Direct Simulation Monte Carlo (DSMC) codes, development of simplified models for vibrational relaxation rates, and numerical modeling of reaction rates in viscous gas flows.

Saint-Petersburg State University

April 2013 – September 2015

Assistant researcher *Department of Hydroaeromechanics*

Development of theoretical models of reaction rates in viscous gas flows and their numerical modeling.

Internships

- **DLR, Göttingen, Germany (November 2017–January 2018).** Implementation of a new vibrational relaxation model for air mixtures in the DLR-TAU CFD solver.
- **The Federal University of Parana, Curitiba, Brazil (October 2016).** Study of the influence of variable diameters of vibrationally excited molecules on relaxation processes in high-temperature gas flows.
- **Khristianovich Institute of Theoretical and Applied Mechanics, Novosibirsk, Russia (February 2016).** Implementation of state-to-state models of non-equilibrium processes in a DSMC code.

EDUCATION

Saint-Petersburg State University

September 2015 — April 2017

Ph.D. degree (in Physical and Mathematical Sciences)

Area of research: Mechanics of Fluids, Gases and Plasma

Department of Hydroaeromechanics

Research supervisor: Prof. E.V. Kustova

Saint-Petersburg State University

September 2013 — June 2015

Masters degree (with excellence) in Mechanics and Mathematical Modeling

Area of specialization: Molecular Kinetic Theory of Fluids and Gases

Department of Hydroaeromechanics

Research supervisor: Prof. E.V. Kustova

Saint-Petersburg State University

September 2009 — June 2013

Bachelors degree in Mathematics and Mechanics

Department of Hydroaeromechanics

Research supervisor: Prof. E.V. Kustova

Additional courses completed

- Intensive German language courses (2 blocks of 85 hours), Goethe Institut Berlin, Germany, 2021
- “Computational Research Techniques” (Applied Parallel Programming, Scientific Visualization, Reproducible Research), Texas Advanced Computing Center, Austin, TX, USA, 2020
- “Machine Learning”, online Stanford University course on Coursera, 2013

TECHNICAL SKILLS

Rarefied gas dynamics	Numerical modeling, DSMC, DVM, Chapman–Enskog method
Programming languages	Python, Fortran, C, C++, Julia, MATLAB, Javascript
Tools	SPARTA DSMC, DLR TAU, Paraview, Git
Other	Machine learning, digital signal processing
Languages	Russian (native speaker) English (fluent, including technical English) German (B2 level speaking, reading, writing)

PROFESSIONAL MEMBERSHIP

COST Network

March 2022 – present

Member of the “Mathematical models for interacting dynamics on networks” (MAT-DYN-NET) networking group, supported by the COST (European Cooperation in Science and Technology) program

RGD NextGen Group

Spring 2021 – present

Member of the RGD NextGen Group, aimed at increasing outreach of the Rarefied Gas Dynamics community

AIAA

December 2019 – present

Senior AIAA Member

Member of the AIAA Thermophysics Technical Committee since spring 2021

Member of Education, Emerging Technologies, Conference subcommittees

ACADEMIC ACHIEVEMENTS

Author and co-author of 22 peer-reviewed publications in SCOPUS/Web of Science-indexed journals and conference proceedings. Participant of 16 international and 10 national conferences.

Reviewer for Computers and Fluids, Acta Astronautica, Computer Methods in Applied Mechanics and Engineering, Applied Mathematical Modelling, Physics of Fluids, Journal of Thermophysics and Heat Transfer, AIAA Scitech Conference, AIAA Aviation Conference, Rarefied Gas Dynamics Conference, MDPI Entropy, MDPI Fluids, MDPI Sensors, STAB/DGLR Symposium Proceedings.

Reviewer of Bachelor and Master theses for Saint-Petersburg State University (2020, 2021) and Peter the Great St. Petersburg Polytechnic University (2021).

Research and travel grants:

Personal grants:

1. Alexander von Humboldt Foundation postdoctoral research fellowship (DLR, Göttingen, Germany), 2021–2023.
2. Research project “Improvements of the thermo-chemical relaxation model used by the DLR-TAU code” jointly sponsored by the DAAD (German Academic Exchange Service) and Saint-Petersburg State University, 2017
3. Research project “Influence of variable diameters of vibrationally excited molecules on relaxation processes in strongly non-equilibrium gas flows” jointly sponsored by the Santander Bank and Saint-Petersburg State University, 2016
4. Research project “Implementation of models of vibrational transitions in direct simulation methods”, sponsored by the Russian Foundation for Basic Research, 2015
5. Saint-Petersburg State University travel grants (2013, 2014, 2017)

2015–2016: Participant of the ESA research project “Exploring angular-momentum phenomenology in aerothermodynamics and MHD”.

2013–2017: Participant of 3 Saint-Petersburg University grants, 1 Russian Science Foundation grant and 3 Russian Foundation for Basic Research grants (not including personal grants).

Stipends and awards:

- Stipend of the Russian President for students and PhD students studying disciplines corresponding to the prioritized areas of modernization of Russian economy (2017)
- Stipend of the Russian Government for students and PhD students studying disciplines corresponding to the prioritized areas of modernization of Russian economy (2016)
- Stipend of the Russian Government for students and PhD students (2016)
- Winner of the Saint-Petersburg Government Grant Competition for Students and Graduate Students (2013)

Invited seminar talks/lectures:

1. Seminar, Institut für Raumfahrtssysteme, Universität Stuttgart, 22 November 2022 (Stuttgart, Germany)
2. Department Seminar, Institute of Aerodynamics and Flow Technology, German Aerospace Center (DLR), 2 November 2022 (Göttingen, Germany)
3. Department Seminar, Institute of Aerodynamics and Flow Technology, German Aerospace Center (DLR), 7 September 2022 (Göttingen, Germany)
4. Bernoulli Institute for Mathematics, Computer Science and Artificial Intelligence, Rijksuniversiteit Groningen, 8 August 2022 (Groningen, Netherlands)
5. Steinbuch Center for Computing, Karlsruhe Institute of Technology (KIT), 16 March 2022 (Karlsruhe, Germany)
6. Department Seminar, Institute of Aerodynamics and Flow Technology, German Aerospace Center (DLR), 23 February 2022 (Göttingen, Germany)
7. Center for Computational Engineering Science, Mathematics Division, RWTH Aachen, 20 January 2022 (Aachen, Germany)
8. RGD NextGen Online Seminar Series, 4 June 2021
9. Department of Aerospace Engineering and Engineering Mechanics, University of Texas at Austin, 15 April 2021 (Austin, TX, USA)
10. PECOS Center, Oden Institute for Computational Engineering and Sciences, University of Texas at Austin, 8 March 2021 (Austin, TX, USA)
11. Center for Computational Engineering Science, Mathematics Division, RWTH Aachen, 12 November 2019 (Aachen, Germany)
12. Department of Aerospace Engineering and Engineering Mechanics, University of Texas at Austin, 28 February 2019 (Austin, TX, USA)
13. Oden Institute for Computational Engineering and Sciences, University of Texas at Austin, 22 February 2019 (Austin, TX, USA)
14. Department Seminar, Institute of Aerodynamics and Flow Technology, German Aerospace Center (DLR), 8 January 2018 (Göttingen, Germany)
